

Full Stack Developer position

Location: São Paulo, SP, Brazil (we are willing to help with housing and relocation costs for those coming from outside Sao Paulo)

Industry: Financial services

Job Description:

We seek strong developers to join us in our financial services technology startup. Our primary focus is on developing quality technology.

Required skills:

- Intellectual curiosity
- Comfortable with Linux/DevOps, vue.js, git, nodejs, test frameworks, CIs, expressjs, passportjs.
- Basic knowledge of cryptography, cybersecurity management
- Fluent in Javascript and at least one of the following languages (python, ruby, scala, go, elixir, erlang, haskell, rust, c++)
- Humility to ask for help when needed

Desired:

- Participated projects (former professional projects, personal projects, contributions to open source software, university groups, etc) and solid academic background are a plus, but not required.

We offer a highly competitive compensation package:

- Very competitive salary, commensurate with candidate's skill set
- End of year bonus package, commensurate with performance

Candidate will directly report to a highly experienced programmer, our hands-on CTO who loves to discuss programming language features and has used Linux daily for more than 12 years ;)

The bottom line is we are building solid technology in an environment that encourages openness, intellectual humility, and we are having a lot of fun doing it.
